Designed and developed a full-stack IRM System for Bando City Hotel Restaurant to streamline daily operations, improve efficiency, and support data-driven decision-making. The system automated core business processes including order handling, **billing, inventory, supplier coordination, kitchen workflows, and customer management**. Features role-based access controls and automated reporting for enhanced operational oversight.

### Key Contributions:

- **Order & Payment Management** : Implemented modules for order placement, invoicing, and multi-mode payment handling, ensuring accurate tracking of transactions.
- **Inventory & Ingredient Management** : Automated stock monitoring, ingredient usage tracking, and GRN (Goods Received Note) recording to minimize waste and stock-outs.
- **Kitchen & Garbage Management** : Designed kitchen order display and status tracking system for chefs and introduced garbage management workflows to reduce food waste.
- **Menu & Submenu Management** : Enabled dynamic configuration of menus, submenus, and pricing, accessible by managers for easy updates.
- **Customer & Supplier Management** : Developed modules to register customers, maintain loyalty data, and manage supplier details including orders and invoices.
- **Employee & User Privilege Management** : Created role-based access control (RBAC) for managers, cashiers, chefs, and staff, ensuring secure data handling and privilege segregation.
- **Reporting & Analytics** : Generated detailed reports on sales, inventory, supplier performance, and employee activity to assist business decisions.
